Classic®

NEW ENGLAND CLASSIC®

New England Classic® is the brainchild of a team of MIT architects. The idea, conceived in 1993, was to bring back the warmth and beauty of fine wood interiors using state-of-the-art materials and methods.

Although the extremely high degree of skilled labor required to produce these beautiful interiors has made them costly for many years, with the New England Classic® System, fine wood panels are affordable again.

The New England Classic® System is available in six design alternatives: Classic Traditional®, Classic American®, Classic Beadboard®, Classic Modern®, Classic Cottage™, and Classic Rustic™.

WHAT IS THE PRODUCT?

The System is designed using components that complement each

other and provide high quality, fully coordinated interior solutions. Every component in the system is engineered and manufactured to meet the most stringent requirements.

The system is also designed to save time and money during installation.

HOW IS THE PRODUCT MADE?

New England Classic's products are made using either select grade-A sliced veneer or decorative film laminated to a stable engineered wood core-technology adapted from high-end commercial furniture manufactured in the US, Canada and Europe. The engineered wood core is more stable than solid wood, making the NEC product less susceptible to shrinkage, twisting, and splitting. Engineered wood is a more environmentally-sensible use of our natural resources.

A variety of panel sizes, along with precision machined rails and stiles, create a fully integrated assembly system. System heights range from 32" to full room height. Custom sized panels may also be specified.

The system minimizes on-site processes, while assuring a high quality, reliable fit for ease of installation.

Available ready-to-finish, or factory finished, the NEC system is the perfect way to achieve the high quality look and feel of custom millwork, at a fraction of the cost.

FEATURES & BENEFITS

❑ The warmth and beauty of fine wood interiors at an affordable price.

❑ Available in several wood species and paintable surfaces.

❑ Easily finished with stain or paint. Use your imagination or check out our factory finishes.

❑ Veneered panel construction minimizes seasonal shrinkage, splitting and twisting.

❑ All components packaged to minimize damage prior to installation.

❑ Installs quickly and easily with minimum job site customizing.

❑ Rails and panels can be easily combined to achieve a broad range of partial (wainscot) and full height wall designs.

❑ Accessories include Window and Door Casings and a Plate Rail.

❑ Free design service.

❑ Complete installation instructions shipped with every order.

❑ Design minimizes need for complex coping of joints.

❑ Nailing grooves assure proper nailing locations and conceal most nail holes.

❑ Standard 32" and 36" wainscotting heights.

❑ Custom panel sizes available.

INSTALL ANYWHERE FOR A WARM, RICH ENVIRONMENT

❑ entry foyers and lobbies

❑ living rooms

❑ dining areas

❑ libraries

❑ offices and conference rooms

❑ master bedrooms and baths

DESIGN CHOICES

SPECIES AVAILABLE:

❑ Cherry ❑ Oak

❑ Maple ❑ Paintable (Primed)

STANDARD SIZES (CUSTOM SIZES ALSO AVAILABLE)

PANEL EXPOSURE WIDTHS AVAILABLE:

• 6" • 9" • 12" • 15" • 18" • 23" • 31"

PANEL HEIGHTS AVAILABLE:

• 9" • 12" • 15" • 18" • 23" • 31" • 47"

FREE DESIGN SERVICE

New England Classic® recognizes that the prospect of sorting through panel sizes, measuring stiles and rails and computing running feet can be daunting to some. So, we have set up a Free Design Service and provide free software.

Just give us your room measurements using our design request forms, and for standard room heights (32" or 36"), we will produce CAD drawings with materials list. For non-standard heights, multiple rooms, custom panels or stairs we will provide project cost

estimates first for customer approval before doing the CAD drawing and materials list.

STAIR PANELSET®

The New England Classic® Stair PanelSet® is nothing short of ingenious.

Now the idea of continuing a raised wood panel treatment from the foyer or entranceway right up the stairs and onto the landings, is affordable.

The system is designed to fit all common residential staircase angles.

FACTORY FINISHES AND CUSTOM FINISHES

You can do your own finish work or choose from three shades of custom stain for New England Classic® Maple, Oak and Cherry wood panels and system components.

Or, for an up-charge, we will match any color stain you desire.

Our eight-step finishing process is similar to that of fine furniture. It includes three sandings and either catalyzed lacquer or a conversion varnish which is preferred for the cherry veneer.

Pre-finished panels speed installation time, making New England Classic® an even more cost effective solution and, produces a superior finished installation that brings the warmth and beauty of real wood panels to your home or office.

**CLASSIC TRADITIONAL®** utilizes raised panels modeled precisely after those found in the great homes of Newport, Rhode Island and Williamsburg, Virginia

**CLASSIC AMERICAN®** features flat panels which are typically found in Shaker or Arts and Crafts homes.

**CLASSIC BEADBOARD®** is a style that has been used extensively throughout homes over the past 150 years.

**MULTI-LEVEL ACCENT WALLS** are easily created with a wide variety of components.
